Education

Ph.D. in Computer Science

December 2001

University of California, Berkeley

Dissertation title: “Operating Systems Techniques for Reducing Processor Energy Consumption”

Committee: Alan Jay Smith (advisor), Randy H. Katz, Geoffrey Keppel

GPA: 4.0

M.S. in Computer Science

December 1995

University of California, Berkeley

Dissertation title: “A Complete Picture of the Energy Consumption of a Portable Computer”

Advisor: Alan Jay Smith

GPA: 4.0

B.S. in Computer Science, B.S. in Mathematics

May 1992

Michigan State University

GPA: 4.0

Professional Experience

Principal Researcher, Systems Group, Microsoft Research

2016–present

Senior Researcher, Systems Group, Microsoft Research

2013–2016

Researcher, Systems Group, Microsoft Research

2002–2013

Microsoft Corporation

- Led, and participated in, research projects advancing the state of the art in systems and security
- Wrote and published papers in top-tier scientific conferences on operating systems, distributed systems, networking, and security
- Incorporated research advances into company products and services, including Azure, Bing, Windows, and System Center Configuration Manager
- Mentored summer interns working on research projects

Graduate Student Researcher

1993–2001

University of California, Berkeley

- Devised and implemented research agenda to analyze the energy consumption of portable computers and develop systems techniques for improving their battery life
- Collaborated with colleagues on other systems research topics
- Published papers in conferences and journals

Research Intern

Summers 1992–1994

Apple Computer, Inc.

- Measured the energy consumption of components of Macintosh computers in different states
- Wrote software to measure the real-life usage of various power states to form a complete picture of computer energy consumption

Course Consultant 1993
National Technological University

- Helped participants in a remote-learning computer architecture class understand the lecture materials
- Graded assignments and exams

Software Engineer Summers 1991–1992
Total Travel Management

- Improved software to continually search online resources for ways to get customers better prices for already-booked travel, including adding support for Southwest Airlines
- Wrote software to robustly and automatically manage allocation of jobs to computers

Engineering Intern Summer 1990
Schlumberger CAD/CAM

- Developed and presented a new approach to writing software tests

Honors and Awards

Distinguished Paper Award, USENIX Security Symposium 2017
Distinguished Reviewer Award, IEEE Symposium on Security and Privacy (S&P) 2017
Best Paper Award, USENIX Symposium on Networked Systems Design and Implementation (NSDI) 2009
Outstanding Graduate Student Delegate, International Achievement Summit 2002
Siebel Scholar 2002
Fellowship Winner, University of California, Berkeley 1996
Fellowship Winner, National Science Foundation 1992-1995
Second Place in World, ACM Programming Contest (team captain) 1992
First Place in Region, ACM Programming Contest (team captain) 1991
Top 50 Finisher, Putnam Mathematics Prize Competition 1992
Top 100 Finisher, Putnam Mathematics Prize Competition 1989–1991

Service

Program Committee Co-Chair, Symp. on Networked Systems Design and Implementation (NSDI) 2019
Program Committee Member, Symp. on Networked Systems Design and Implementation (NSDI) 2018
Program Committee Member, Symposium on Operating Systems Principles (SOSP) 2017
Program Committee Member, Symposium on Security and Privacy (S&P) 2017
Program Committee Member, Symp. on Networked Systems Design and Implementation (NSDI) 2017
Program Committee Member, Symposium on Security and Privacy (S&P) 2016
Program Committee Member, Symp. on Networked Systems Design and Implementation (NSDI) 2016
Program Committee Chair, International Conference on Peer-to-Peer Computing (P2P) 2015
Treasurer, Symposium on Operating Systems Principles (SOSP) 2015
Program Committee Member, International World Wide Web Conference (WWW) 2015
Program Committee Member, Conference on File and Storage Technologies (FAST) 2014
Program Committee Member, Network and Distributed System Security Symposium (NDSS) 2014
Program Committee Member, Workshop on Hot Topics in Operating Systems (HotOS) 2013
Program Committee Member, Int. Conference on Distributed Computing Systems (ICDCS) 2013
Program Committee Member, International Conference on Peer-to-Peer Computing (P2P) 2013
Program Committee Member, International Conference on Peer-to-Peer Computing (P2P) 2012
Program Committee Member, Workshop on Massively Multiuser Virtual Environments (MMVE) 2012
Program Committee Member, European Conference on Computer Systems (EuroSys) 2011
Panelist, NSF Expeditions in Computing 2011
Program Committee Member, Workshop on Massively Multiuser Virtual Environments (MMVE) 2010

Registration Chair , Symposium on Operating Systems Principles (SOSP)	2009
Program Committee Member , International Workshop on Peer-to-Peer Systems (IPTPS)	2009
Program Committee Member , International Workshop on Peer-to-Peer Systems (IPTPS)	2008
Sponsorships Chair , Symposium on Operating Systems Principles (SOSP)	2007

Patents

1. “Executing native-code applications in a browser,” Mar. 2017, U.S. Patent No. 9,588,803.
2. “Decentralized sleep management,” Feb. 2017, U.S. Patent No. 9,582,062.
3. “Automated verification of a software system,” Jan. 2017, U.S. Patent No. 9,536,093.
4. “Trusted hardware component for distributed systems,” Sep. 2016, U.S. Patent No. 9,455,992.
5. “End-to-end security for hardware running verified software,” Jun. 2016, U.S. Patent No. 9,363,087.
6. “Partitioned artificial intelligence for networked games,” May 2016, U.S. Patent No. 9,327,194.
7. “Utilization of a protected module to prevent offline dictionary attacks,” Mar. 2016, U.S. Patent No. 9,294,281.
8. “Securing anti-virus software with virtualization,” Jan. 2016, U.S. Patent No. 9,230,100.
9. “Personal identification combining proximity sensing with biometrics,” Oct. 2015, U.S. Patent No. 9,152,868.
10. “Operating a sleep management service,” Feb. 2015, U.S. Patent No. 8,966,063.
11. “Fast, non-write-cycle-limited persistent memory for secure containers,” Aug. 2014, U.S. Patent No. 8,812,908.
12. “Method and apparatus for thwarting traffic analysis in online games,” May 2014, U.S. Patent No. 8,719,336.
13. “Leveraging remote server pools for client applications,” Oct. 2013, U.S. Patent No. 8,549,106.
14. “Securing anti-virus software with virtualization,” Nov. 2012, U.S. Patent No. 8,307,443.
15. “Network coordinate systems using IP information,” Mar. 2012, U.S. Patent No. 8,144,611.
16. “Network application performance enhancement using speculative execution,” Mar. 2012, U.S. Patent No. 8,140,646.
17. “Partitioned artificial intelligence for networked games,” Mar. 2012, U.S. Patent No. 8,137,199.
18. “Collection ordering for replicated state machines,” Mar. 2012, U.S. Patent No. 8,135,987.
19. “Automatic commutativity detection for Generalized Paxos,” Oct. 2011, U.S. Patent No. 8,046,413.
20. “Isolation environment-based information access,” Sep. 2011, U.S. Patent No. 8,024,815.
21. “Reducing bandwidth requirements for peer-to-peer gaming based on error difference between actual game object state and simulated game object state being below an error threshold,” Apr. 2011, U.S. Patent No. 7,925,601.
22. “Reducing bandwidth requirements for peer-to-peer gaming based on importance of remote objects to a local player,” Dec. 2009, U.S. Patent No. 7,627,632.
23. “Lossless recovery for computer systems with map assisted state transfer,” Dec. 2008, U.S. Patent No. 7,472,129.
24. “Efficient changing of replica sets in distributed fault-tolerant computing system,” Feb. 2008, U.S. Patent No. 7,334,154.
