

# Celebrity Jeopardy! — Solution

Step 1: Treat each two-word category as a clue, and deduce the resulting two-word answer using the enumeration below the clue. See the first column of page 3 for these answers.

Step 2: Identify the pictures, guided by the fact that for each dollar value the pictures are in alphabetical order. See page 2 for the identifications.

Step 3: Note that each category answer can be spaced differently to produce two different words, much like “An Album” or “These Men” in the Celebrity Jeopardy! sketches. Those two words are picture identifications from Step 2.

For instance, COMMUNAL CHICKEN is a clue for PUBLIC HEN, which can be spaced differently to make PUB LICHEN. See the next page for the correspondences.

Step 4: For each answer, add the dollar amounts associated with its two corresponding pictures (clued by the flavor text, “Now the points should really add up!”). Then, divide by \$100 and use the result to index into (either form of) the answer to get a letter.

For instance, PUB has value \$100 and LICHEN has value \$400. Adding these together gives \$500, so take the 5<sup>th</sup> letter of PUBLICHEN, which is I. See page 3 for the results.

Step 5: Read the letters obtained in Step 4 in category-clue order, top to bottom, left to right. Add spaces to those letters to form the clue:

INSULATION BRAND OR RIME MONARCH

Solve this to get the answer, **FROST KING**.
